

Feedback to Enhance Learning

Enhancing Effective Teaching Series (4)

Feedback providing students with specific and clear information about their level of performance.

Feedback Aims to enhance learning by providing students with the opportunity to reflect on their level of performance and how to improve it.

When you provide feedback

- Point out the issues that the student can improve.
- Provide suggestions for improvement actions. Ask questions that lead the student to a deeper level of answering.
- Direct the student to the next stage and link to other resources.

Feedback Presenting Mechanisms

- It is presented individually or in groups and may be orally or written.
- The degree of details in the feedback varies with the levels of students in the academic programs.
- It can be offered by the faculty member or through the rubrics or by peer review.

Enriching Resources

Student Learning Assessment Policy at King Saud University

Students' dissatisfaction with the feedback may be due to

- ✓ Time of offering feedback.
- ✓ The quality of the feedback and possibility of benefiting from it.
